DEPARTMENT VISION & MISSION

Vision

To be a centre of excellence in Computer Science and Engineering education, and produce competent professionals for a successful global career contributing to society.

Mission

M1: To build a faculty team with industry and academic exposure, capable of moulding students into competent professionals, supported by adequate computing and software resources.
M2: To prepare students for a global career in computing by enriching the curriculum with a blend of theory and practice.
M3: To develop industry-relevant programming and soft skills through training programmes, vibrant student clubs and student internships.
M4: To engage with industry and institutes of repute and collaborate in academics, research and development, involving faculty and students.

Editorial Note

We are happy to release the March 2025 edition of Tech Bytes. It showcases the achievements of faculty and students and highlights the various events conducted by COEs and I&E cells to enhance academics in our department. We conducted the IEEE International Conference this semester and are proud to present the report.

We are happy to include technical articles from faculty members and students of our department. The newsletter is generated with the aid of "Newsletter Builder" developed by Dr. Preethi Sheba, Prof. N. Sreedevi, Raghav Reddy R and Koppala Rakshith.

Head of Department
Dr. Kesavamoorthy R

Editors
Prof. N. Sreedevi
Dr. Preethi Sheba Hepsiba

HoD's Message

Dear Readers,

It gives me immense pleasure to present this edition of TechBytes, showcasing the remarkable achievements, innovations, and initiatives of the Department of Computer Science & Engineering. This newsletter reflects our commitment to academic excellence, research, and holistic development, with our students and faculty making significant strides in hackathons, research, placements, and entrepreneurial ventures.

Our IEEE International Conference, student club activities, and expert talks have enriched learning beyond the classroom, fostering a culture of curiosity and innovation.

I extend my heartfelt gratitude to the faculty, students, and staff for their dedication and contributions in making this department a hub of knowledge, creativity, and excellence. Let's keep striving for greater heights!

Recognition for Revolutionizing Digital Consent with Innovative App 'Pact'

CMR Institute of Technology (CMRIT) Bengaluru is making waves in the technology landscape with a groundbreaking app that redefines how users interact with app policies like End User License Agreements (EULAs) and Terms & Conditions (T&Cs).

PACT : An App Developed by a Team of six students from Third - year of CSE, ISE, and ECE departments, under the guidance of Mrs. Navaneetha M, Assistant Professor, Department of CSE. Pact addresses a critical problem faced by millions of users worldwide: the dense and often incomprehensible legal jargon in app policies (T&Cs). The app simplifies this process with an AI-powered platform that translates these documents into concise, user-friendly bullet points and allows users to clarify or expand specific clauses. Additionally, Pact introduces an overlay feature that integrates seamlessly into mobile and desktop apps, acting as a shield against exploitative UI designs like dark patterns. By highlighting and clarifying ambiguous terms or deceptive prompts in real time, the app ensures users make informed decisions and promotes ethical design practices across digital platforms.

This innovation earned Team Pact the prestigious Smart India Hackathon 2024, organized by the Ministry of Education, held at Excel Engineering College, Komarapalayam, Namakkal District, Tamil Nadu. Competing against some of the brightest minds in the country, Team Pact's vision of transparency and empowerment set them apart and secured their well-deserved victory.

The students' success at the Smart India Hackathon 2024 is a testament to their dedication and ingenuity and reinforces CMRIT's reputation as a hub for innovation and excellence.

Team Pact:

Bhaavan Prabhakar(Team Lead),
Ashwin Jose Thomas,
Celia Rose Thomas,
Christopher Mark D'Souza,
GLK Abhiram Reddy and
Abhay Margabandhu
Mrs.Navaneetha M (Mentor)

Transformative ties: The fusion of innovation and responsibility for the society - 11, 12 Dec 2024

Innovate to Elevate: A Showcase of Entrepreneurial Brilliance

A mini-project exhibition was organized on 19 December 2024, showcasing a total of 83 projects across diverse domains such as web technology, artificial intelligence, Machine learning, etc. These projects are guided by 16 faculty members. These projects demonstrated the students' creativity, technical skills, and their ability to meet diverse client needs. By bridging the digital divide and promoting technological inclusivity, these projects contributed to addressing societal needs and fostering community development, preparing students for professional challenges in the field of web development.

Inventive Minds: A showcase of intellectual property in action

The Education Day celebration included an expert talk on "Innovation in Education: Redefining the Learning Experience," which was organized by the I&E Cell Dept. of CSE in collaboration with IIC CMRIT. The session was conducted by Dr. Debasmita Mishra, Research Coordinator at Presidency University, on 27th November 2024. It was an exploration of innovative practices in education, focused on transforming teaching and learning methodologies to enhance the overall learning experience. At the end of the session, the resource person facilitated an engaging activity for the students, adding an enjoyable and interactive dimension to the event.

Validate To Innovate: Pre-Incubation Idea Support

Date: 28 October, 2024
Organizer: Dr. Kesavamoorthy R
Objective: The "Validate to Innovate: Pre-Incubation Idea Support" program, organized by the I&E Cell and CSE Department of CMRIT in collaboration with IIC and the Startup Club, aimed to foster a culture of innovation among students by providing early-stage support for entrepreneurial ideas. The objective was to guide participants through the initial phases of idea validation, helping them assess the feasibility and potential impact of their concepts before progressing to incubation stages.
Summary: This program brought together students and early-stage

entrepreneurs to focus on the essential stages of startup ideation and validation. Through a series of workshops, mentorship sessions, and interactive activities, participants delved into various aspects of innovation, such as identifying customer needs, prototyping, and assessing feasibility. The event fostered a collaborative environment where students gained practical insights from experienced professionals, enhancing their understanding of the entrepreneurial journey.

Benefits: Participants gained valuable skills in critical thinking, market research, and business model development, preparing them for the competitive landscape of startups. The program's interactive format enabled networking with mentors and peers, fostering a supportive community for budding entrepreneurs. This initiative not only aligned with the Institution's Innovation Council objectives but also demonstrated a commitment to nurturing innovation-driven students ready to make impactful contributions to the startup ecosystem.

Expert Talk

Innovation in Education: Redefining the Learning Experience

The Education Day celebration included an expert talk on "Innovation in Education: Redefining the Learning Experience," which was organized by the I&E Cell Dept. of CSE in collaboration with IIC CMRIT. The session was conducted by Dr. Debasmita Mishra, Research Coordinator at Presidency University, on 27th November 2024. It was an exploration of innovative practices in education, focused on transforming teaching and learning methodologies to enhance the overall learning experience. At the end of the session, the resource person facilitated an engaging activity for the students, adding an enjoyable and interactive dimension to the event.

The Role of Innovation in Driving Startup Growth

Resource Person : Dr. Preeti Jacob

UBA Awareness: Strengthening Roots Building Futures for Innovation

Date: 17 September, 2024

Resource Person: Dr. Kesavamoorthy R

MSME Idea Hackathon: Igniting Innovation, Empowering Enterprises

Date: 18 September, 2024
Resource Person: Dr. Kesavamoorthy R
To inform and inspire students about the transformative potential of innovation in the Micro, Small, and Medium Enterprises (MSME) sector. This program emphasized the importance of addressing real-world challenges faced by MSMEs through creative and impactful solutions.

Smart Minds, Smarter Solutions: Smart India Hackathon 2024

Date: 2nd September, 2024
Resource person: Dr. Kesavamoorthy R
To inform and inspire students about the upcoming hackathon. The session provided students with the objectives, structure, and impact of the Smart India Hackathon, including how it provides a platform for innovation and problem-solving. The program covered key details such as the themes, participation process, timelines, and the benefits of taking part in the event.

Faculty

Faculty Awards

Sl. No.	Recipients	Remarks
1	Prof. Rajeshwari	**Exceptional efforts and dedication as the Faculty Placement Coordinator**
2	Prof. Pooja Goud	**Outstanding contributions as the TYT Coordinator.**
3	Prof. Sagarika Behera	**Elite + Silver Certification for the NPTEL Course on "Introduction to Algorithms and Analysis"**
4	Prof. Lini Oommen	**Awarded with Elite + Silver Certification and also secured Top 2% for the NPTEL Course on "Digital Circuits"**
5	Prof. Paramita Mitra	**Elite + Silver Certification for the NPTEL Course on "Introduction to Machine Learning"**
6	Prof.Reshma R	**Elite + Silver Certification for the NPTEL Course on "Introduction to Machine Learning"**
7	Dr. Hemangi Goswami	**Elite + Silver Certification for the NPTEL Course on "Introduction to Internet of Things".**
8	Prof. Ranjini	**Exceptional efforts and dedication as the Recruitment Coordinator**
9	Prof. Sheetal	**Exceptional efforts and dedication as the Faculty Placement Coordinator**

10	Prof. Rajni Tiwari	**Elite + Silver Certification for the NPTEL Course on "The Joy of Computing Using Python".**
11	Prof. Paramita Mitra	**Elite + Silver Certification for the NPTEL Course on "Introduction to Machine Learning".**
12	Dr. Jayanthi N	**Elite + Silver Certification for the NPTEL Course on "Machine Learning for Soil and Crop Management".**
13	Dr. Preethi Sheba Hepsiba	**Best Projects award at Techno Meet for Society - Nov 2024 for the project Newsletter Builder.**
14	Prof. Sreedevi N	**Best Projects award at Techno Meet for Society - Nov 2024 for the project Newsletter Builder.**
15	Prof. Rajni Tiwari	**ERP Coordinator**
16	Ms. K. P. Namitha	**For exceptional dedication, sincerity, and proactive approach. Her unwavering commitment and organizational skills have played a pivotal role in the smooth operation of all laboratory activities.**
17	Prof. Krishna Sowjanya K	**100% result in the Fourth Semester Analysis and Design of Algorithms (B-Section)**
18	Prof. Attar Mahay Sheetal	**100% result in the Sixth Semester SOFTWARE ENGINEERING & PROJECT MANAGEMENT (B Section)**
19	Prof. Lini Oommen	**100% result in the Sixth Semester SOFTWARE ENGINEERING & PROJECT MANAGEMENT (C Section)**
20	Prof. Rajni Tiwari	**100% result in the Sixth Semester FULLSTACK DEVELOPMENT**
21	Dr. Hemangi Goswami	**100% result in the Sixth Semester COMPUTER GRAPHICS AND FUNDAMENTALS OF IMAGE PROCESSING**
22	Prof. Arpit Sharma	**100% result in the Sixth Semester DATA SCIENCE AND VISUALIZATION**
23	Prof. Navneetha M	**100% result in the Seventh Semester BLOCKCHAIN TECHNOLOGY (21CS734)**
24	Prof. Navneetha M	**Invaluable support in making the "One Nation One Celebration" event a grand success**
25	Prof. Savitha N J	**Invaluable support in making the "One Nation One Celebration" event a grand success**
26	Prof. Smitha N	**Invaluable support in making the "One Nation One Celebration" event a grand success**
27	Prof. Prateek Kumar	**Invaluable support in making the "One Nation One Celebration" event a grand success**
28	Prasanna Kumar N	**For exceptional dedication, sincerity, and proactive approach in supporting the department**
29	Mr. Praveen D	**For exceptional dedication, sincerity, and proactive approach in supporting the department**

Technology Corner

The 64th edition of the TOP500 reveals that **El Capitan** has achieved the top spot and is officially the third system to reach exascale computing after Frontier and Aurora.

Rank	System	Cores	Rmax (PFlop/s)	Rpeak (PFlop/s)
1	**El Capitan** - HPE Cray EX255a, AMD 4th Gen EPYC 24C 1.8GHz, AMD Instinct MI300A, Slingshot-11, TOSS, HPE DOE/NNSA/LLNL United States	11,039,616	1,742.00	2,746.38

Student Club Events

ACE Club

ACE Club Registrations

On 8th October 2024, from 2 pm to 4 pm, in LH503, the ACE Club hosted its annual registration event to onboard new members. Participants were required to fill out a Google Form to register their interest, select a preferred role: Technical, Graphic Design, Event Management, or Social Media Management. Shortlisted candidates were invited for face-to-face interviews with a panel of 2-4 judges. The interviews evaluated candidates based on their chosen roles, assessing their skills, creativity, and problem-solving abilities. The event successfully onboarded new talent, fostering growth in full stack web development and related domains within the club.

Codexia

On October 30th, 2024, from 2:00 PM to 4:00 PM, the ACE Club hosted Codexia, a hands-on event focused on HTML tags. Participants engaged in a unique bingo game in which HTML tags were cyphered, challenging them to decode and identify each tag. The event provided a fun and interactive way for participants to enhance their knowledge of web development while testing their quick-thinking and problem-solving skills.

GeekForGeeks

Decodemoji

Decodemoji was an engaging event designed to introduce students to the fundamentals of data structures in an innovative way on 27 November 2024. The session started with a concise yet informative explanation of key data structure concepts, ensuring participants gained a solid theoretical foundation. This was followed by the highlight of the event fun and interactive activity where students solved emoji-based puzzles to identify different data structures. The puzzles added a creative twist to learning, transforming abstract ideas into visual and relatable representations. The activity encouraged participants to think critically and apply their newfound knowledge in a practical context. Designed specifically for beginners, the event made learning approachable and enjoyable, breaking down complex topics into manageable concepts.

The Array Blueprint

The **Array Blueprint** was conducted on 20.10.2024 and is an in-depth coding event focused on mastering arrays, a fundamental data structure in programming. Participants began with the basics, learning how to traverse and reverse arrays effectively. Building on this foundation, the event introduced more advanced topics, such as

working with 2D arrays and performing matrix operations. Sorting and searching algorithms were also covered, giving attendees essential tools for efficient data manipulation. Real-world examples and practical applications helped solidify these concepts, making the learning experience both relevant and engaging. Each session included hands-on exercises, allowing participants to apply what they'd learned in a supportive, interactive environment. Fun quizzes added an element of challenge, reinforcing key techniques and encouraging active participation. The event was designed for both beginners looking to enhance their skills and those with some experience who wished to deepen their understanding of arrays. Additionally, every participant received a certificate of completion, serving as a formal acknowledgment of their progress and skills. Beyond technical knowledge, The Array Blueprint aimed to foster a sense of community among coding enthusiasts, providing a platform for networking and knowledge sharing. By the end of the event, attendees gained the confidence and skills to tackle array-related challenges in their coding journeys.

Hiring for GeeksForGeeks club

The GeeksforGeeks Club recently invited enthusiastic individuals to join a vibrant community dedicated to mastering Data Structures and Algorithms (DSA) and cutting-edge technologies. This event provided a unique opportunity for attendees to explore various roles within the club, including technical development, event planning, content creation, and design. Participants engaged in enriching discussions, gained access to exclusive workshops and competitions, and collaborated with like- minded peers to enhance their skills and boost their resumes. To select the best candidates, two rounds were conducted. The first round was a quiz designed to test the candidates' proficiency in key areas, while the second round involved an interview process where shortlisted candidates were assessed on their skills and enthusiasm. The event successfully brought together individuals passionate about coding and innovation, fostering a supportive environment for growth in the tech field!

Hackerearth Club

First Byte

"First Byte" is an engaging introductory event designed to help students kickstart their journey into coding, algorithms, and competitive programming. Scheduled on 6th October 2024 in LH-505 from 11:20 a.m. to 12:20 p.m., the event provides valuable insights into problem-solving techniques essential for technical interviews, guidance on excelling in competitive programming, and tips forplacement preparation with a focus on algorithmic thinking. Participants also explore hackathons on platforms like LeetCode and Hackerrank, gaining hands-on experience to enhance their coding skills. The session serves as an excellent opportunity to build foundational knowledge and connect with like-minded peers

Creative Coders Arena

On 4th Dec 2024, LeetCode offered curated coding challenges for all levels, from beginners to pros, designed to push limits and enhance problem-solving abilities. These problems encouraged participants to think outside the box and explore new approaches to solving real-world issues. Coders had the opportunity to compete with others, sharpening their skills and learning from diverse solutions.A standout feature was the Crack the Code: PhonePe Special, where participants stepped into the shoes of a tech interview candidate. Inspired by PhonePe, one of India's leading fintech companies, this challenge provided technical round questions commonly asked in top firms' interviews. By tackling these problems, participants gained valuable insight into the interview process, helping them understand what companies like PhonePe expect from candidates. It was a great opportunity to simulate high-stakes technical interviews, build confidence, and improve preparation for future career opportunities in the tech industry.

MindSpark

Recruit the top 20 skilled and passionate individuals for Mindspark Club’s core teams.

Mindspark Club on 7th October 2024 recently conducted an interactive recruitment event to onboard new members. The goal was to select 20 of the best candidates out of those who applied. The candidates were divided into teams of 4, each focusing on a specific domain: technical team, design team, content team, and event management team.

Given Mindsparks core focus on competitive coding, the interviews were designed to evaluate coding skills, problem-solving abilities, creativity, and collaboration potential. This structure ensures the inclusion of diverse skill sets while maintaining a strong emphasis on technical expertise.

Competitive Coding 101

Competitive Coding 101 was a relaxed, beginner-friendly session perfect for the students who were curious about competitive coding but unsure where to start. We went through the essentials together-step-by-step and at a comfortable pace covering basic coding ideas and simple problem-solving techniques. By the end, we have tackled the first coding challenges, learned our way around coding platforms, and, most importantly, built confidence to keep going. We also built and strengthened their real-time logic and skills.

International Conference

IEEE - 5th International Conference on Communication, Computing & Industry 6.0 - 2024 (C2I6-2024)

Date: 6th to 7th December 2024
Venue: D Block, Ground Floor AV Hall
General Chair: Dr. Kesavamoorthy R, HoD & Professor, Dept. of CSE, CMRIT, Bengaluru
General Co-Chairs: Dr. Kavitha P, Associate Professor, Dept. of CSE, CMRIT, Bengaluru
General Co-Chairs: Dr. Sanchari Saha, Associate Professor, Dept of CSE, CMRIT, Bengaluru

Statistics: Total Number of papers received: 579 No. of Foreign papers: 11
No. of Industry papers/ Govt organization papers: 4
Number of papers cleared 1st round review: 134
Number of papers given final acceptance: 103
Total no. of papers registered for the conference: 68
Tracks: Communication and Networks:
Data Science and Advanced Computing Circuits and Systems Industrial Automation
Chief Guests: Dr. Sanju Tiwari, Professor, Sharda University Greater Noida, India.
Dr. Prasant Misra, Senior Scientist, TCS Research, India.
Ms. Neha Kumari, Senior Product Manager, Cavali Wireless & Chair- IEEE Bangalore Young Professional, India.
The IEEE - 5th International Conference on Communication, Computing & Industry 6.0 2024: Provided a platform for Presentation and discussion of cutting-edge research, technical papers, and innovations in various domains like Communication and Networks, Data Science and Advanced Computing, Circuits and Systems & Industrial Automation. Provided a platform for professionals, researchers, students, and industry leaders to network. Awarded best paper presentations to recognize excellence in technical work and contributions.

Invited Talk

Generative AI: Innovating and Revolutionizing Product Development

Objective:To create awareness among students about the use of Generative AI in product development and also the challenges from engineers points of view.
Summary:This workshop introduced college students to key market trends in India, such as AI, cloud computing, and sustainability, and their impact on industries. We explored the use of Java 8s Stream API and lambda expressions for efficient, functional programming, as well as Python's lambda functions for dynamic solutions. The session emphasized aligning technical skills with market needs, equipping students with insights to create industry-relevant solutions
.Benefits: Students learnt about different AI tools and their applications in product development, the challenges and its impact, etc.

Leveraging Innovation and Market Trends for Industry-Relevant Solutions

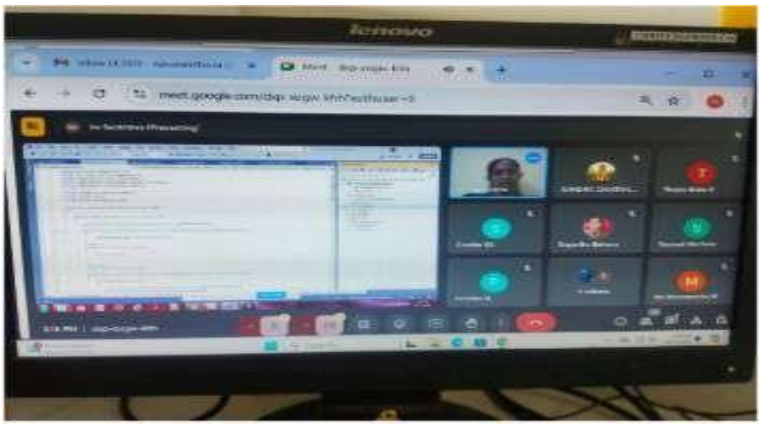
Date : 2 January 2025

Objective: To create awareness among students about the key market trends in India, such as AI, cloud computing, and sustainability, and their impact on industries.

Summary: This workshop introduced 1st year students to key market trends in India, such as AI, cloud computing, and sustainability, and their impact on industries. Students explored the use of Java 8s Stream API and lambda expressions for efficient, functional programming, as well as Python's lambda functions for dynamic solutions. The session emphasized aligning technical skills with market needs, equipping students with insights to create industry-relevant solutions.

Benefits: Students got the idea of key market trends in India, such as AI, cloud computing, and sustainability, and their impact on industries.

:C# and .NET for Product Development in Industry



Objective: To create awareness among students about how C# and .NET can be used in product development.

Summary: Alumni talk was given by Suchitra I M. currently working as Fullstack developer in EY GDS. Speaker explained the concepts of C# and .NET so that participants can understand the basics. She explained completely by demonstrating the concepts.

Benefits: Students learnt how C# and .NET can be used in cloud, the different applications of C# and .NET, the technology behind it etc.

Mentoring Session

Evaluation of ideas submitted for MSME Idea Hackathon 4.0

Px Competency

Orientation Program on Using HackerEarth Platform

The training program provides an overview of the HackerEarth platform, focusing on its usage for hosting coding challenges, hackathons, and technical assessments. Conducted by Dr. V. N. Manju, this orientation is aimed at equipping attendees with the knowledge to navigate the platform efficiently for learning, competitive programming, and recruitment-related activities.

Student Awards

Student National/International Awards			
Sl. No.	**USN**	**Name**	**Remarks**
1	1CR21CS137	Preetesh R Shetty	2nd Runner up - Aptitude Hackathon 1.1 2024
2	1CR22CS006	Abhinav P V	Won Second Prize in Bilingual Turncoat Debate competition in the event " CMR Intra Group Fest - CYGNET' 24 held on 22nd November 2024
3	1CR23CS065	Gowtham V U	Tug Of War Men Team Participated in VTU Bangalore Central Division Tug Of War Tournament for the men held at CMRIT Bangalore From 9th to 10th Dec-2024. and Secured FIRST PLACE (WINNERS) and Qualified for the VTU State Tug Of War tournament to be held at Akshya IT Tumkuru from 13th to 15th Dec-2024
4	1CR22CS208	Varad Rajeev	
5	1CR22CS012	Ajitesh Kumara	Second Runners Up in the Chess Competition in the New Horizon Cup 2024
6	1CR22CS048	Bhaavan Prabhakar	Team PACT has emerged as the winner of the Smart India Hackathon (SIH) held at Excel Engineering College, Komarapalyam, Namakkal District,Tamil Nadu.
7	1CR22CS037	Ashwin Jose Thomas	
8	1CR22CS048	Celia Rose Thomas	

9	1CR22CS051	Deeksha Sheoran	Throwball Women Team Participated in VTU Bangalore Central Division Throwball Tournament for the women held at VEMNA IT Kormangala Bangalore From 12th to 13th Dec-2024. and Secured SECOND PLACE (RUNNERS) and Qualified for the VTU State
10	1CR23CS046	Chandana S	
11	1CR23CS112	Mudunuri shrilekha	Silver Honour in the finals of the International Youth Mathematics Challenge (IYMC) 2024
12	1CR23CS105	Marulasiddesh Patel G N	Kannnada club 2nd Place in Mono acting (Bahurupi – Jyothi Nivas Autonomous College) 2nd Place in Reel Making (Kannada Kalarava – St. Joseph College of Commerce)
13	1CR22CS094	Mohan M	

Best Projects- Final Year

Sl. No.	USN	Name	Remarks
1	1CR21CS203	Vanantharaman	First Place CSPW004 - AI-Powered Interview Simulation Platform
2	1CR21CS204	Vaishnav Sudheer	
3	1CR21CS207	Varun Tejas	
4	1CR21CS211	Vishal P	
5	1CR21CS027	Anchal Singh	Second Place - CSPW065 - Testpilot – Implies Power of Automation Test and Bug Detection
6	1CR21CS032	Anjali Singh	
7	1CR21CS006	Abhishek BR	Third Place - CSPW069 –WebConnect
8	1CR21CS007	Abhishek Kumar	
9	1CR21CS033	Ankit Sreenivasa	

Best Mini Projects - 3rd Semester

Sl. No.	USN	Name	Remarks
1	1CR23CS051	D Abhilash Reddy	Won First prize in Mini Project - IoT-based Smart Parking System guided by Dr. N Jayanthi
2	1CR23CS063	Gaury Shibu Sanker	
3	1CR23CS027	A Ritheesha	
4	1CR23CS138	Rachit Srivastava	Won second prize in Mini Project - Face Liveness etection Authentication Platform guided by Prof. Lynsha
5	1CR23CS147	Ritu Upadhyaya	Won Third prize in Mini Project - CMR Simulator guided by Arpit Sharma
6	1CR23CS084	Kasturi Kumari	
7	1CR23CS006	Aaryan Upadhyay	

Class Representatives

Sl. No.	USN	Name	Sem
1	Allamprabhu S J	1CR23CS028	4th
2	Harshini Mamidipalli	1CR23CS068	4th
3	Mohammed Numaan	1CR23CS110	4th
4	Mudunuri Shrilekha	1CR23CS112	4th
5	Shrutee Singh	1CR23CS185	4th
6	Shivam Raj	1CR23CS177	4th
7	Devender Singh	1CR22CS054	6th

8	Celia Rose Thomas	1CR22CS048	6th
9	Prajwal BG	1CR22CS128	6th
10	Mabisha M	1CR22CS093	6th
11	Sripad Kulkarni	1CR22CS191	6th
12	Sanjana G Nadig	1CR22CS168	6th

Projects selected internally for SIH

Sl. No.	USN	Name	Title of the projects got selected internally for SIH
1	1CR23CS033	Anasuya Chakraborty	Implementation of the Alumni Association platform for the University/Institute.
2	1CR23CS041	B K Rakshita	
3	1CR23CS043	Bachu Mahita	
4	1CR23CS053	Dhanyaashri M	
5	1CR23CS068	Harshini Mamidipalli	
6	1CR23CS099	M B Bincy Jeen	
7	1CR23CS180	Shraddha Anand Jambagi	Detecting oil spills at the marine environment using Automatic Identification System (AIS) and satellite datasets
8	1CR23CS156	Saatwik Satpathy	Solution for end-to-end tracking of dual use chemicals used in both legitimate industries and illicit drug production from point of manufacture to point of end use/export.
9	1CR23CS031	Ananya Kulkarni	Solution for end-to-end tracking of dual use chemicals used in both legitimate industries and illicit drug production from point of manufacture to point of end use/export.

Training Program

V Sem Patent Traning for CSE

Date : 13,14,November 2024
Coordinators: Dr. Jayanthi N. By participating, students gained practical insights into drafting patent applications, conducting prior art searches, and leveraging patents for academic, entrepreneurial, and career opportunities. The session also highlighted available institutional and government support to facilitate the patent process, preparing students to contribute effectively to the tech-driven innovation ecosystem.,

Workshop

Knowledge Sharing Workshop on SIH 2024 Idea submission

Date : 12 Sept 2024

Speakers : Dr. Sharmila K P, Dr. Kesavamoorthy

Students are provided insights into the themes and problem statements for SIH 2024Guided participants through the process of brainstorming and refining their ideas Offered practical advice on how to structure and present their submissions effectively.

Faculty & Student Technical Articles

India's Path to Semiconductor Independence in a Changing Global Landscape

Dr. Prem Kumar Ramesh
Professor, Department of CSE,
CMRIT Founder, Axlaron Semiconductors PVT LTD

As the world progresses into the 21st century, technological advancements continue to shape economies and societies. The semiconductor industry, the backbone of modern computing, is critical for national security, economic strength, and technological progress. For India, a nation with a booming digital economy and self-reliance aspirations, developing a robust semiconductor ecosystem is crucial.

The Geopolitical and Technological Imperative:

Recent global events highlight the need for reducing dependence on foreign semiconductor supply chains. The US-China trade war, sanctions against Huawei, and tensions in the Taiwan Strait expose vulnerabilities in global semiconductor sourcing. Taiwan, home to TSMC, the world's largest semiconductor foundry, is at the center of geopolitical conflicts, raising concerns about supply chain resilience. Meanwhile, China is heavily investing in its domestic semiconductor strategy. India, as the world's most populous nation and a growing economic power, cannot afford to rely on imported chips. Its computing infrastructure, mobile phones, laptops, data centers, and embedded systems depends largely on foreign semiconductor technologies, leading to high costs, licensing restrictions, and supply chain risks.

India's Semiconductor Landscape and the RISC-V Opportunity.

India has made notable progress in semiconductor research, with initiatives like the Design Linked Incentive (DLI) and the India Semiconductor Mission (ISM). The indigenous Shakti processor and the recent IRIS processor from IIT Madras have demonstrated India's capability to produce industrial-grade chips for embedded applications, robotics, and IoT. However, the country still lacks mass-market, commercial-grade processors for mainstream computing and mobile applications.

RISC-V, an open-source instruction set architecture (ISA), presents a strong opportunity. Unlike proprietary architectures like Intel's x86 and ARM, RISC-V offers flexibility and cost-effective customization, allowing Indian companies to develop tailored solutions. Major tech players like Google, Qualcomm, and Alibaba are investing in RISC-V, recognizing its potential to disrupt the semiconductor industry.

Building a Sustainable Semiconductor Ecosystem

To achieve semiconductor self-reliance, India must address key challenges:

Manufacturing Capabilities: Despite progress in chip design, India lacks large-scale fabrication (foundry) capabilities. Taiwan, South Korea, and China dominate fabrication, while India remains dependent on imports.

Partnerships with global foundries and planned domestic investments are crucial.
Skilled Workforce: Semiconductor design and manufacturing require specialized expertise. Expanding talent through university-industry collaboration and dedicated semiconductor education is essential.
Supply Chain Integration: A self-sufficient industry demands a well-developed ecosystem, including raw material sourcing, component manufacturing, and packaging/testing infrastructure.
Public-Private Collaboration: Policy support, financial incentives, and strong collaboration between the government and private sector will drive long-term success.

The Road Ahead: Innovation, Collaboration, and Youth Engagement

Indian startups and research groups are actively working on commercial-grade computing chips, focusing on mid-tier and value-tier markets where cost-performance balance is crucial. By leveraging RISC-V and fostering local design expertise, India has the potential to carve a niche in the global semiconductor industry.
The rise of AI, 5G, and IoT offers new opportunities for India to integrate semiconductor innovations into emerging technologies. Custom silicon solutions for AI acceleration, edge computing, and secure processing can strengthen India's global position.

A crucial factor in this transformation is the active involvement of India's youth engineers, researchers, and entrepreneurs who are driving semiconductor design and innovation. With enhanced semiconductor education, startup incubators, and government incentives, young technologists are poised to lead India's semiconductor revolution.

While global semiconductor giants continue to dominate, India's emphasis on open-source architectures, energy-efficient designs, and localized manufacturing combined with the enthusiasm and ingenuity of its younger generation can drive self-sufficiency. With the right mix of policy support, private sector investment, and homegrown talent, India is well-positioned to become a key player in the semiconductor industry, fostering sustainable growth and technological leadership in the years ahead.

Agentic AI: Taking the Reins

By,Prof. Arpit Sharma
Assistant Professor,CSE Dept, CMRIT

Forget passive AI reacting to data. Agentic AI is about intelligent systems seizing the reins, perceiving their world, setting goals, and acting autonomously. These "agents" are not just programmed; they are built to:

- Sense: Absorb data like we do, but on a massive scale, using sensors and complex algorithms. They are able to process data from several sources simultaneously, identifying patterns and anomalies that would be invisible to the human eye.
- Think: Analyze information, make informed choices, and develop strategies—going beyond simply following rules to adapt and evolve. This involves complex reasoning, planning, and problem-solving, allowing them to navigate uncertain environments and achieve their objectives.
- Do: Execute actions in the real world, from moving robotic limbs to managing complex systems. This could involve physical actions in the real world, like manipulating objects or navigating a vehicle, or digital actions, like managing a network or optimizing a process.
- Learn: Refine their "thinking" and "doing" through experience, constantly improving. With machine learning, they can review past performance, pinpoint areas for growth, and refine their strategies accordingly.

This isn’t some futuristic concept—Agentic AI is already capable of:

➢ Revolutionize Industries: Think autonomous vehicles navigating complex traffic, personalized medicine tailored to individual genetic profiles, and smart factories optimizing production in real-time. These are just a few ways agentic AI is reshaping industries and unlocking new opportunities.

➢ Reshape Our Lives: Imagine AI assistants that understand your needs before you do—scheduling your tasks and tackling problems before they even surface. Agentic AI could personalize education, provide customized healthcare recommendations, and even help us manage our finances more effectively.

➢ Accelerate Discovery: Unleash AI to analyze vast datasets and uncover breakthroughs we might miss. From drug discovery to climate modeling, agentic AI can help us understand complex systems and accelerate scientific progress.

However, This capability comes with a deep sense of responsibility. We must address:

★ Safety: How do we ensure these autonomous agents won't cause harm? This requires rigorous testing, robust safety protocols, and careful consideration of potential risks.

★ Ethics: What happens when AI makes decisions with profound consequences? It's crucial to set clear ethical guidelines and ensure AI systems align with human values.

★ Security: How can we keep these systems safe from bad actors? As AI grows more powerful, it also becomes a bigger target for cyberattacks. Strong security measures are crucial to prevent misuse and maintain their integrity.

Agentic AI's future is bright, but it demands careful navigation. It's not just about building smarter machines; it's about building them responsibly. We must encourage open discussions, strengthen collaboration between researchers and policymakers, and ensure that agentic AI serves the greater good. Autonomous AI is no longer a distant concept—it’s here. How we guide its development is in our hands. We’re at a pivotal moment, with the opportunity to drive groundbreaking progress and enhance countless lives. But it’s up to all of us to make sure this technology is used responsibly and ethically.

Is AI Truly Intelligent?

Author: Sai Shankar
Date: 23rd February, 2025

Is AI Truly Intelligent?

Something's been bugging me about how people hype up so-called "AI" and the recent trends about how it'll change the job market and how it will replace developers and professionals instantly, and i don't agree to a certain level.

It sure will impact the job market but won't replace the work entirely. Its a tool to make your work faster and less boring.

AI - Artificial Intelligence, but is it truly intelligent? How do we define intelligence? AI is smart, sure, but I believe it's not intelligent yet.

Intelligence v/s Smart

Let's begin by defining how we define "intelligence" and "smartness", Intelligence is the ability to understand, reason, and learn, and being smart is being knowledgeable on the specific / range of tasks or subjects matter presented. Smart is sharp or on point. Intelligent is understanding or discerning.

LLM's (large language models), often disguised as "AI" are trained on these huge chunks of data, information collected over a long period of time and trained to interconnect between each other to produce or present the info in a structured manner (*to explain in a layman language*).

Humans work(*observing the environment and taking it as an input data continuously*) in a similar way, but here's a twist, the human brain. Its not trained on some "previous" data and are not just data-driven pattern recognizers. Humans experience emotions, intuitions, dreams, and a deeper sense of meaning which the current ability of AI lacks.

AI or AK?

Let's say we equip robots with sensors for heat, emotion, touch to help them perceive the world but they will still lack an innate sense of "right and wrong". It still doesn't know what to do when temperature of its body is rapidly increasing, will it stay just like that under the heat? or will it move away just how humans react? its not possible to tell unless the human provides an instructions or set conditions. It is smart (can sense the heat) but not intelligent (does nothing after
realizing?).

But keep in mind that intelligence is not just memory. Actually intelligence & memory/knowledge are complementary It is not an "AI" actually, but AK, Artificial Knowledge. But this does not mean that the impact will not be huge on jobs, since for about up to 98% of tasks this interpolation-limited "intelligence" is "good enough".

AI is making us dumber

Yep, ironically instead of AI making us smarter, studies suggests that it's making us dumber. you may have noticed in past few months how "ChatGPT" and "Deepseek" has taken over the internet by storm with all of the trends because of their capabilities.

When faced with a problem, we no longer think critically. And we seek to these LLMs often-called as "AI" for answering the question almost instantly and we don't think about the problem at all in the first place. sure, it does give the answer but how we reach the answer is more important than the answer itself. how? because it *is the **best** way to learn.* we explore 10 different ways to solve that problem and we learn each of it and choose which one is the best for us. We don't reach the absolute dead-end and think about all the possibilities and the edge-cases of the question

Looking Forward

What LLMs can be good for, is to serve as knowledge/routine stores for an actual AGI (basically AI with intelligence). They're a memory – a representation of a data corpus -- and memory is a necessary component of intelligence.

I am not at all against of AI, instead it's so exciting to see how we're moving so fast towards new technology and I am very optimistic about it, and this was just my take on what the *current* AI trend / tech-bubble is all about.

Department of Computer Science and Engineering

The department is a recognized research centre under VTU and offers doctoral programmes in computer sciences. The programme aims to provide students with a strong foundation in Computer Science and enable them to integrate their knowledge with other disciplines for carrying out innovative discoveries.

Many of the computer science graduates from CMRIT step directly into computer-related career positions in both private and government agencies, while some choose to continue their education in graduate degree programmes.

Accreditation, Approvals and Recognition:

The Department of Computer Science & Engineering is approved by the National Board of Accreditation (NBA), New Delhi, and AICTE, New Delhi. It is permanently affiliated to Visvesvaraya Technological University (VTU), Belgaum in Karnataka and is also recognized by Govt. of Karnataka.
