Visvesvaraya Technological University
AICTE Activity Report

College Name: **C.M.R. INSTITUTE OF TECHNOLOGY KUNDAL HALLI** Branch Code : **CS**

SL.NO	USN	Student Name	No Of Activity Conducted	Activity Details	Minimum Activity Points	Total Obtained Points
1	1CR20CS176	SHASHIKANT SAH	5	A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

2	1CR21CS001	AAROGYA OJHA	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

3	1CR21CS002	AAYANAM ANIRUDH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A13 => **Automation of local activities involves integrating technology to streamline and optimize tasks and processes within communities, increasing efficiency and productivity while reducing manual labor.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.**	100	100

4	1CR21CS003	ABHASH DEEP	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

5	1CR21CS004	ABHINASH RAUL	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A4 => **Fostering tourism promotion through innovative approaches entails leveraging technology, cultural heritage, and community engagement to create unique and immersive experiences that attract visitors while positively impacting local economies and preserving natural and cultural resources.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

6	1CR21CS005	ABHINAV BARANWAL	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

7	1CR21CS006	ABHISHEK B R	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

8	1CR21CS007	ABHISHEK KUMAR	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

9	1CR21CS008	ADITI	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A4 => **Fostering tourism promotion through innovative approaches entails leveraging technology, cultural heritage, and community engagement to create unique and immersive experiences that attract visitors while positively impacting local economies and preserving natural and cultural resources.**	100	100

10	1CR21CS009	ADITYA ADARSH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

11	1CR21CS010	ADITYA KUSHWAHA	5	A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A12 => **Food preservation or packing involves utilizing techniques and materials to extend the shelf life and maintain the quality of perishable food items, ensuring their safety and availability for consumption over time.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

12	1CR21CS011	ADITYA PRAKASH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

13	1CR21CS012	ADITYA RAJ	5	A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

14	1CR21CS013	ADITYA S	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A4 => **Fostering tourism promotion through innovative approaches entails leveraging technology, cultural heritage, and community engagement to create unique and immersive experiences that attract visitors while positively impacting local economies and preserving natural and cultural resources.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

15	1CR21CS014	ADITYA UMESH UPADHYAY	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

16	1CR21CS015	AFFAN	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

17	1CR21CS016	AIBAN LAMPHANG DKHAR	5	A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

18	1CR21CS017	AJAY KUMAR CHAUBEY	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

19	1CR21CS018	AJITH K	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A12 => **Food preservation or packing involves utilizing techniques and materials to extend the shelf life and maintain the quality of perishable food items, ensuring their safety and availability for consumption over time.** A4 => **Fostering tourism promotion through innovative approaches entails leveraging technology, cultural heritage, and community engagement to create unique and immersive experiences that attract visitors while positively impacting local economies and preserving natural and cultural resources.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

20	1CR21CS019	AKARSH KUMAR	5	A11 => **To assist the marketing of rural produce involves implementing strategies to improve visibility, accessibility, and market reach for locally produced goods, fostering economic growth and sustainability in rural communities.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

21	1CR21CS020	AKSHANSH TRIPATHI	5	A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

22	1CR21CS021	AKSHITA R	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A12 => **Food preservation or packing involves utilizing techniques and materials to extend the shelf life and maintain the quality of perishable food items, ensuring their safety and availability for consumption over time.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

23	1CR21CS022	AMAN KUMAR	5	A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

24	1CR21CS023	AMAN MAHATO	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

25	1CR21CS024	AMAN RAJ	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

26	1CR21CS025	AMIT S MALLI	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

27	1CR21CS026	AMULYA BIRADAR	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

28	1CR21CS027	ANCHAL SINGH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

29	1CR21CS028	ANIRUDH RAI	5	A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A11 => **To assist the marketing of rural produce involves implementing strategies to improve visibility, accessibility, and market reach for locally produced goods, fostering economic growth and sustainability in rural communities.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

30	1CR21CS029	ANISH BISTA	5	A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

31	1CR21CS030	ANISH RAHUL PUJARI	5	A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

32	1CR21CS031	ANJALI SINGH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A10 => **Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.**	100	100

33	1CR21CS032	ANJALI SINGH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.**	100	100

34	1CR21CS033	ANKIT SREENIVASA	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A6 => **Reducing energy consumption entails implementing efficiency measures and adopting renewable sources to minimize usage while maintaining or improving productivity and comfort.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

35	1CR21CS034	ANNAPURNA MORABAD	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

36	1CR21CS035	ANUSHA KRISHNA	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.**	100	100

37	1CR21CS036	ANUSHA M	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A8 => **Facilitating 100 percent digital transactions involves creating an ecosystem where all financial interactions and transactions are conducted electronically, promoting efficiency, transparency, and financial inclusion.**	100	100

38	1CR21CS037	APARNA DAYANAND HIREMATH	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A15 => **Contributions at the national level indicative of the Government of India encompass policies, programs, and initiatives aimed at fostering economic growth, social development, and environmental sustainability across the country.** A3 => **Creating a sustainable water management system involves implementing practices and infrastructure that ensure efficient use, conservation, and equitable distribution of water resources to meet present and future needs while preserving environmental integrity.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100

39	1CR21CS038	ARJUN CHAUDHARY	5	A1 => **Empowering local communities through collaborative efforts to enhance enrollment and improve outcomes in higher, technical, and vocational education.** A10 => **10. Developing and managing an efficient garbage management system entails implementing comprehensive waste collection, segregation, recycling, and disposal practices to minimize environmental impact and promote public health.** A14 => **Spreading public awareness under rural outreach programs involves disseminating information and educating communities about relevant topics to promote empowerment, well-being, and sustainable development.** A5 => **Promotion of appropriate technologies involves advocating for and facilitating the adoption of sustainable and contextually suitable technological solutions to address specific challenges and improve livelihoods.** A7 => **To skill rural population involves providing training and education opportunities tailored to their needs and local contexts, empowering them with the knowledge and abilities to succeed in various sectors and contribute to community development.**	100	100
